Eager to work on new projects, learn new technologies & programming languages

Skills

Javascript
Ajax
ReactJS
Html
Css
Svg
Photoshop
Illustrator

Work experience

Gamesoft

Lead Front-end developer
November 2015 – Present, remote

Arvossa

Lead Front-end developer
October 2014 – November 2015 (1 year 2 months), remote

Secondary School of Mechanical Engeneering

Teacher
September 2003 – August 2014 (11 years)
Cacak, Serbia, Eastern Europe

Summary

In love with design, in love with data

More than 12 years of crafting beautiful Web Pages and User Interfaces for web applications.

I have a strong understanding of responsive web. I write clean and commented HTML5, CSS3 and JS (ES5) code. I can work with (integrate, edit and optimize) any graphic format used (JPG, PNG, SVG, Font-icon ..). I am advanced user of Photoshop and Illustrator.

I am proficient with responsive frameworks such as Bootstrap and Foundation. For writing css I am using preprocessors such as Sass and Less. For css architecture I am using OOCSS and BEM methodologies.

If you are using some technology stack I am not familiar with, I am always, always keen to learn something new. I love Javascript and React. I am familiar with Node, Express, React, Meteor, Angular(1.x) and Vue.

On projects I am working, I came up with solutions not excuses. I am reliable developer and person and will be a great member of your team.

Although my focus is on design, I like to work with data as well. I am familiar with various RESTful services and know how to add, fetch, update, delete and parse data (CRUD). I know how to parse data with raw Javascript and with libraries such as Underscore and Lodash.

I am familiar with tools used in modern web development such as NPM, Webpack, Browserify, Bower, Gulp, Grunt, Browser-sync etc.

I am proficient with Git and Github and have pushed plenty lines of code to public and private Github repositories. I am contributing to opensource projects.

Last, but not least, I know how to create responsive newsletters (Html emails) and currently learning data visualisation with D3 library (and enjoying a lot).

Online education

Pluralsight, Nodeschool.io, Egghead.io, Lynda.com, Udacity
Coursera, Edx.org, Mongoschool
